

## Elevating Healthcare Efficiency with Secure, Intelligent Browser-Based Document Interactions

Sprkz transforms healthcare document engagement with a secure, user-friendly web application. It makes viewing PDFs and interacting with documents faster and more efficient. This enhancement significantly improves the patient and provider experience, ensuring easy information sharing between patients, providers, and extended care teams.

Using the familiar PDF format, Sprkz adapts to healthcare needs, addressing challenges like the continued use of faxes. It offers a digital document solution that is HIPAA compliant and convenient, working entirely within web browsers—no special software needed. Access it on your phone, desktop, iPad, or any device.

Leveraging modern web standards and AI, Sprkz simplifies form completion and remembers past entries, making repetitive tasks easier. This browser-based approach ensures secure, efficient, and accessible healthcare information management, enhancing the quality of care and the overall experience.

### Key Benefits

- **Secure Access:** Access documents securely with Stampz, our Web 3.0-powered fax alternative. Benefit from mobile identity management and lock specific documents and PDF fields for added protection.
- **Web-Based Document Access:** Access digital documents easily on desktop and mobile devices through a web-based browser, ensuring seamless accessibility.
- **Increased Efficiency and FHIR Compatibility:** Streamline document interactions and reduce manual data entry with zPaper dataDocuments™. Capture data to the system of record, including FHIR data for better sharing across systems.
- **Data Accuracy:** Reduce reliance on OCR and improve accuracy with streamlined document interactions to achieve higher data quality and cost savings.
- **Improved Patient and Provider Engagement:** Enhance information exchange with tools that empower patients and providers for seamless and efficient data sharing and validation

## Features and Capabilities

**Smart Data Entry:** Input your information once and let our system auto-fill it across your documents—no more repetitive typing.

**Markup and Notes:** Highlight important details, add stamps, and include additional notes with markup capabilities.

**eSignature:** Easily sign documents with built-in eSignature capabilities. Save your signatures for future use.

**Access to Health Database:** Utilize the available, out-of-the-box CareQuality database to access the physician contact directory and information about available prescription drugs (names, doses, etc.), enriching document detail and accuracy.

**dataDocument™ Features:** Use dataDocuments™ to capture of structured FHIR data. Make document data actionable and map it with fields within Salesforce, ServiceNow, and EHRs. Benefit from current and future AI use cases.

**SprkzAI:** Summarize large amounts of documents efficiently with generative AI features.

## Redefine Your Healthcare Document Interactions With Sprkz

Streamline workflows, enhance engagement, and ensure secure, efficient document interactions.
